ADMITS BORING INTO PILOT CUNNINGHAM SKULLS OF HUMANS IS DEAD AT NORFOLK

Ann Arbor Professor Defends Vivisection on Heads of the Insane.

ANN ARBOR, April 12.-It was no long ago that Dr. U. J. Wile, profesor in the medical school of the University of Michigan, went to the Pon tiac State Hospital for the Insane, bored and extracted from each a quantity of rain substance with which he inoculated raphits.

When the rabbits became infected Di Wile said that the presence of the spilunaties had been established and the cause of paresis in the patients deter-

Laymen were less impressed by this discovery than they were that vivinection had been practiced on human beings in a State hospital, probably without their browledge.

out their knowledge.

The result is that Dr. Wile is being attacked in a broadcast distribution of circulars and his colleagues are railying to his support. The question of whether human vivisection shall be applied as a support of the control of permitted, especially in asylums sed hospitals where the wishes of the patient are not consulted, has thus been brought strikingly to the public's at-

Several interesting facts have been brought to light by acknowledgment of Dr. Wile and his assistants. The showed that physicians consider the act of entering a hospital for treatment implies assent to any experi-ments which the surgeon may con-sider necessary to enable him to as-certain the nature of the patient's

of one goes to the hospital they may perform an experiment and no further permission will be asked, according to one of the nest prominent men on the faculty. That is, the physician will not ask any further permission unless the experiment jeopardizes life. They might even drill a hole in the patient's head in the interest of effence. For, this physician said, this is not considered a dangerous experiment. perinient.

Dr. Wile explaining what he hinself has done, says:

"The method of puncture is as follows: The patient's head is first shaved and the anterior portion of the skull theroughly painted with tine'are of ledine. The region is frozen with ethyl chloride and a recolving dental drill is thrust guickly through the skin and deeper tissues. A few rapid revolutions of the drill in the hands of an assistant suffice to pierce the skull.

"The drill is then removed and a long, thin needle is inserted and pushed firmly and deeply into the cortex. A syringe barrel is attached to the end of the needle. Bu suction a small cylinder of brain substance containing both gray and white matter is frawn into the instrument, together with more or less fluid from the ventricle.

"The operation is extremely simple One has only to avoid the cerebral and meningeal vessels, and over the upper frontal region, well away from the mid-

In al cases thus far examined practically no pain has been expereinced."

At Pontiac Dr. Christian placed the usual facilities at the disposal of Dr. Wile and provided the natients. These, it is claimed, were hopelessly insane. Consent of their guardians wes neither secured nod thought necessary. They were dying of passels and the operation neither hastened nor retarded the course of the disease. The operations were called successful, masmuch as they proved the contentions of Dr. Wile.

Physicians and surgeons in general have little to say on the subject, but refer interviewers to Dr. Wile, who is extremely reticent.

prominent physician said there is no danger in trephining, and it sound more serious to the layman than it really is. It is no more injurious than to draw blood from the finger tips, and the moment the operation is over the natient is up and feels no particular

"By these operations Dr. Wile estab-lished the cause of parests, which hith-erto had baffled scientists," said this physician, "No one knows the cause of HAT SHOP, 508 lith st. N. W. 1 physician. "No one knows the cause of searlet fever, and I presume will never know until we have experimented on a child. We should have to be able to study the disease as we pleased—in a little boy or girl—and possibly we will have to allow another child to contract the disease from the one under observation."

Capt. E. Marvie Cunningham has gon his last haven.

The Virginia pilot, discoverer Christie Mathewson, and friend Washington newspaperrsen, was buried oday at St. Mary's Cemetery, Norfolk. Captain Cunningham, who was in charge of the annual cruise of parties from the Capitol Press Gallery, and particular close friend of Tom Pence, late secretary of the Democratic National Committee, was fifty-four years of age Sunday. After the death of his notes through the skulls of six patients, wife a month ago Captain Cunningham went to Buffalo Lithia Springs, but falling to regain his health, returned to

falling to regain his health, returned to Norfolk where he died Sunday.

For nearly ten years Captain Cunningham spent his vacations attending the world's series, being particularly well known to men who were in baseball a decade ago and who are still identified with the sport. He was a native of Richmond. After a few years in the tug boat business with Capt. J. J. Cole, he became a master pilot. He was a director of the Seaboard National and Church Street Banks, and of the Twin City Permanent Building Association of Norfolk, and took an active interest in local and State politics, and was a member of the city council. Captain Cunningham was at one time owner of the Norfolk club, in the old Atlantic League, and later owned the franchise in the Virginia League, it was while he was owner of the Virginia League club that he developed Christy Mathewson, whom he sold to the New York National League club.

Captain Cunningham was a cousin of the late Frank W. Cunningham, of Richmond, and is survived by one son, E. Harvie Cunningham, ir., of Newport News; one sister, Mrs. Anna F. Cole, of Campostella; two brothers. Ernest Cunningham, of Newport News, and C. C. Cunningham, of San Francisco.
